

### **CERVELO RS Triple**

Cervelo's RS delivers the ultimate combination of efficiency, lightness and comfort! This svelte speedster features Cervelo's rigid Squoval top and down tubes, an oversize bottom bracket and Smartwall optimization that adds carbon where it's needed most for lightning-quick acceleration and amazing handling. Yet, without the perfect fit, the RS would be just another bike. So Cervelo dialed in the RS with a taller head tube for minimal seat-to-bar drop and increased the chainstay length 1cm to balance and smooth the ride, and help you achieve your ideal position and comfort. Vibration-damping is further enhanced by the slight curve of Cervelo's wafer-thin seatstays to add a remarkable road feel. You'll also appreciate the corner-carving 3T Funda PRO carbon fork, the crisp-shifting Shimano Ultegra drivetrain.

I got this bike a few years ago for an Italian cycling holiday, but I'm now riding my Lynsky more and it's time for this beauty to go. I'm 5'11" and 250 lbs. This bike performed flawlessly. I climbed mountain roads used in races and hit over 70 kph downhill without so much as a wobble. It has primarily seen dry weather, but the frame does show signs of use, as expected. This bike has been lovingly ridden so there are blemishes, purely cosmetic.

Recently tuned up at my LBS. This is one great bike!

**FRAME SIZE:** 52 cm

**WHEELS:** Easton EA90SL or XERO XR-1

**COMPONENTS:** Shimano Ultegra (new cables) TRIPLE

**SADDLE:** Selle San Marco Rolls, Bontrager, Selle Royal, or Seagull – your choice!
