

PRO-FORM Le Tour de France Model No. PFEX01312.1

Get the experience of riding outside without leaving the comfort of your own home. You draw the route-anywhere in the world-and iFit Technology Powered by Google Maps automatically downloads the map to your console. What you see is exactly what you feel-every hill, every flat and every decline. This versatile Indoor Cycle delivers more options for a greater benchmark performance. With 24 Digital Gear Controls you can personalize any workout. Interactive Incline and Decline Controls allow your bike to follow the road. Intelligent Wind Resistance factors in your height and weight for a calculated drive. Train like a Pro with Le Tour de France Indoor Cycle.

Ride Anywhere in the World with Google Maps iFit Technology Built-In

With the iFit Technology Powered by Google Maps you can ride anywhere in the world! Choose from 24 pre-mapped courses or create your own. Ride over the Passage du Gois or climb the hills of Mont des Alouettes in France. Now you can experience these same trails and more on this Indoor Cycle. With iFit Technology you can ride where the Pro's do. The world is at your fingertips. Map any route and enjoy the ride! Google and Google Maps are registered trademarks of Google, Inc. Includes one year iFit membership for free.

Built-In Power Meter

The built-in power meter is an internal device that allows you to monitor your watts and RPM's directly on the console.

Eliminate the hassle of attaching a separate device to measure your watts and RPM's—the ProForm Tour de France Indoor Cycle comes equipped with a built-in power meter. The built-in power meter is an internal device that allows you to monitor your watts and RPM's on the console as you ride. The power meter allows you to tune-in to your ride and monitor your watts and RPM's for a better benchmark performance. Now you can make certain that you are challenging yourself while perfecting your ride. With the power meter you can get real-time feedback on how hard you are training.

It Does What the Street Does -20 - 20% Digital Incline and Decline Controls

Introducing incline and decline that matches the street! Now, you can experience any route around the world and Le Tour de France Indoor Cycle automatically adjusts the incline and decline to simulate the terrain! No matter the route, no matter the map, your bike moves to follow the road. So, you get a realistic workout-just as if you were outside-but without the traffic, potholes and weather. Now you can have the perfect day on your road bike every day of the year with Le Tour de France Indoor Cycle.

Handlebar Shifters

You can now conveniently alternate gears just like you would on your road bike with the new Handlebar Shifters! Right and left Handlebar Shifters simulate front and rear sprockets just like your road bike.

Designed to match that of your road bike—the left shifter adjusts resistance in the front sprockets while the right shifter adjusts resistance in the rear sprockets. With 24 different resistance levels you can adjust your ride by the slightest amount possible on an indoor cycle and develop more cardiovascular strength.

Intelligent Wind Resistance for a More Personalized Experience

Any indoor bike can give you resistance-but only Le Tour de France Indoor Cycle can give you Intelligent Wind Resistance. Intelligent Wind Resistance automatically adjusts the resistance of your bike based on your wind profile. Our smart technology calculates your height and weight to apply the natural resistance you would get out on the road. A climb in your basement is exactly like a climb outside.

What the pros are saying...

"After winning the Ironman Hawaii World Championships again, I shifted my focus on putting myself back on the Australian Olympic Team for London. I was told this was an impossible dream and that finding the power and speed to match guys half my age was simply a midlife crisis. I grabbed myself a TDF bike and used set programs to look at developing the strength, speed and power that would be necessary to race at the speeds necessary to win Olympic medals again. At 38 years of age I was told "impossible", "Can't be Done" and "no chance" Thanks to the TDF bike and the specific indoor sets we could control, we achieved the impossible and qualified for the Olympic Shadow squad. It is without question the best way to get the specific results you are looking for."

Chris McCormack, 2010 Ironman World Champion

"The "Tour De France Trainer" is incredible because it has a very realistic road feel. In over 20 years of riding trainers, I've never ridden anything even close. My favorite features are the Google Maps application, and that the bike actually rotates up or down based on uphill and downhill. The "Tour De France Trainer" is by far the closest stationary bicycle to the road I've ever experienced! Five stars!"

Lewis Elliot, Former US National Team Cyclist

- iFit Live Technology Built-InGet smarter workouts and faster results! Featuring workouts Powered by Google Maps, automatic incline, decline and resistance controls, this wireless technology is the ultimate workout experience
- 3.5-Inch Full Color DisplayKeep track of your workout time, distance, pulse and calories burned with this easy-to-read display. iFit Live Workouts are displayed through Satellite View from Google Maps
