

CLASSIC DE ROSA PROFESSIONAL SLX - MID 1980S

Widely considered "The Master", Ugo De Rosa manufactured masterpieces which strongly influenced the cycling industry. The Professional SLX is one of the best bicycles which left the De Rosa factory in the 1980s. Manufactured with Columbus SLX steel tubes, a very light and stiff tubing with inner reinforcements, butted sections and reinforced chain stays, the Professional SLX really embodies the perfection and attention to details of the Milanese frame builder. Simply beautiful, masterly manufactured in Italy. The Professional SLX also marked a turning point in the history of De Rosa, creating the link between traditional and modern steel frame design. A great example of Ugo De Rosa's legacy. A bicycle with a great appeal for connoisseurs and steel road bike enthusiasts.

56 cm frame, Shimano Ultegra components, downtube shifters, with 8 speed rear cassette and 2 front chain rings.

Selling Price: \$1,200.00 OBO
